

## Geotechnical work near you

### Upcoming daytime geotechnical boring

Starting as early as **Thursday, Oct. 31**, Sound Transit plans to begin drilling to collect soil samples for analysis near the 19th Ave SW and SW Charlestown St intersection (see map at bottom right). Sound Transit is in the early planning phase for the West Seattle and Ballard Link Extensions project (see reverse side for project map). This work will inform our analysis of the alternatives along the north slope of Pigeon Point that we are studying in the Draft Environmental Impact Statement. Additional borings in this area will occur in the coming months; we will keep you informed as that work is scheduled.

### What to expect

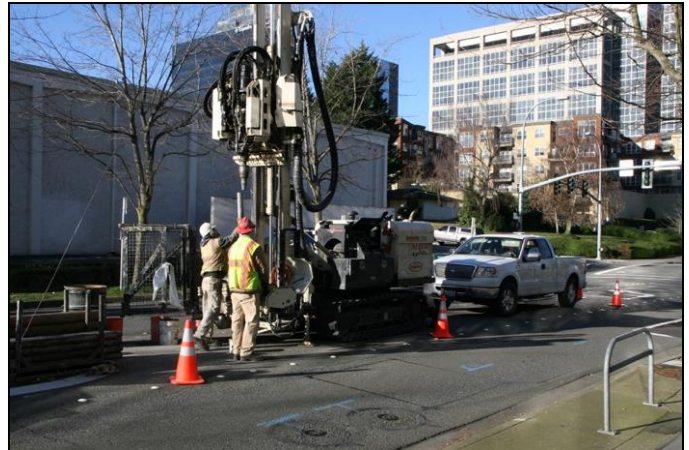

- › Work will occur from 8:00 a.m. – 5:00 p.m., Monday – Friday, and take approximately five days to complete.
- › Parking along 19th Ave SW north of SW Charlestown St will be restricted. “No parking” signs will be placed at least 72 hours prior to work starting; sidewalks will remain open.
- › Flaggers will be present to direct traffic around the work area.
- › Drilling equipment will sound similar to a truck engine running, with occasional hammering.
- › The boring will be about 4-12 inches in diameter and will be filled and patched when work is complete.
- › If you have questions about this work, please call **206-903-7229**.

● Approximate boring location

The West Seattle and Ballard Link Extensions project is part of the voter-approved Sound Transit 3 Plan (ST3) to expand the regional mass transit system. When complete in 2030 (West Seattle) and 2035 (Ballard), these extensions will provide fast, reliable light rail connections to dense residential and job centers throughout the region.
