

# NOTICE OF UPCOMING WORK

January 29, 2020

## GEOTECHNICAL DRILLING WORK FOR FAUNTLEROY CREEK CULVERTS REPLACEMENT PROJECT

### PROJECT DESCRIPTION

Seattle Public Utilities (SPU) is replacing two culverts at 45th Ave SW and California Ave SW. These culverts are in degraded condition and need to be replaced to reduce the risk of structural failure and to remove barriers to fish passage. In the coming months, you may see members of the project team in the area to support the design development process. These site visits may have limited impacts to neighbors or traffic.

### DESCRIPTION OF UPCOMING DRILLING WORK

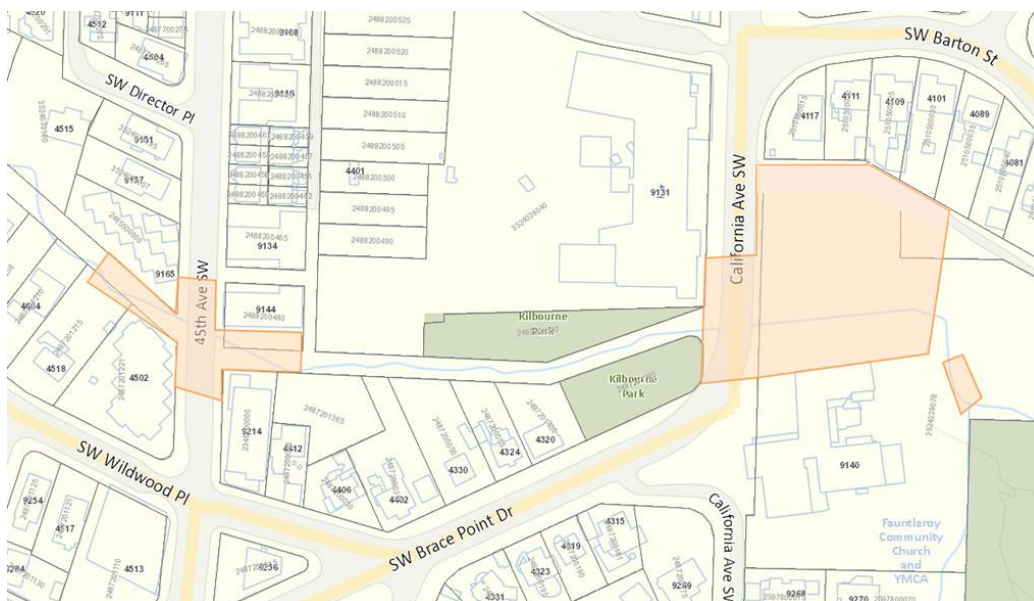

SPU will be conducting a geotechnical drilling investigation to provide more subsurface information to support early project design for the culvert replacements.

### SCHEDULE

This geotechnical work is expected to begin as early as Feb. 10 or shortly after. SPU anticipates geotechnical investigation activities for all work areas to be completed within about 3-5 weeks of starting. Work will occur during weekday, daytime hours.

### LOCATION

Work will occur within the areas marked in orange on the map below. Crews will be moving between several work areas on private property and in the right-of-way that are adjacent to and/or above the existing culverts. Private property owners have been notified of upcoming work.

## **ANTICIPATED IMPACTS**

During the investigations you can expect:

- Periodic noise including engine noise, drilling, and hammering.
- Traffic restrictions, including travel lane modifications, in or near the work area may be required. Please pay attention to onsite signage and flaggers.
- 24-hour parking restrictions will be in effect in some areas.
  - “No Parking” signs will be posted in advance of work.
- Work in the alley off of California Ave SW is currently scheduled for Feb. 13.
  - During this time, there will be no parking in the right-of-way.
  - Crews will try to maintain driveway access but may need to close access to the alley during daytime, working hours.
  - Please pay attention to onsite signage, and park your car in an alternative area, if needed.
- A vehicle-mounted drill rig and support truck staged onsite.
