### PROJECT OVERVIEW

*Underground electrical cables were originally installed in parts of the Endolyne/Brace Point area in 1971. In 2011, a Seattle City Light contractor tested and where possible, injected the cables with silicone to extend their life. However, several cable segments could not be injected and must be replaced. City Light has hired a contractor to replace the aging electrical infrastructure in the Brace Point area with new conduits, cables, vaults and streetlights. This work is tentatively scheduled to start in August 2021.*

*Customers can learn more about this project by attending our **virtual community meeting on Wednesday, August 4, 2021, from noon to 1 p.m.***

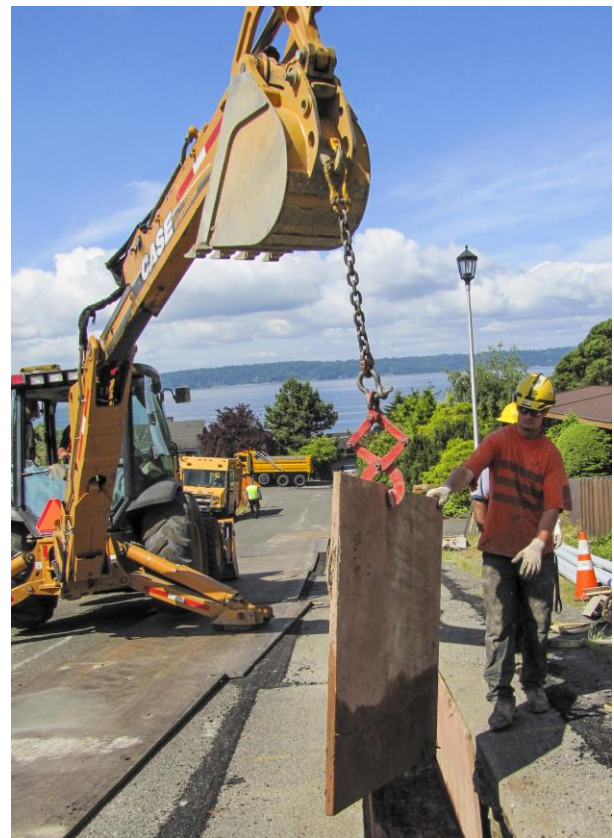

*Register for this meeting by visiting [bit.ly/brace-point](https://bit.ly/brace-point).*

### PROJECT BENEFITS

- This work will result in enhanced electrical reliability and reduce the likelihood of unplanned power outages in this area.

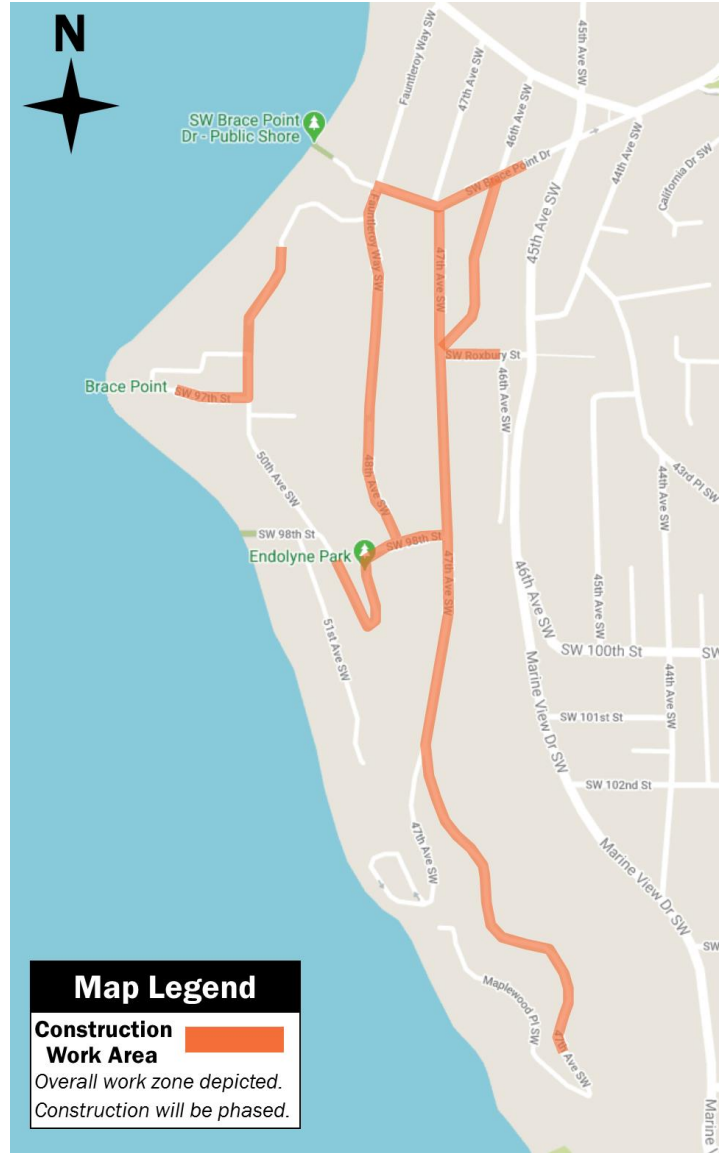

### COMMUNITY MEETING DETAILS

- Customers are invited to attend our upcoming virtual community meeting on **Wednesday, August 4, 2021, from noon to 1 p.m.** to discuss the project. City Light staff will provide a brief presentation and answer questions from meeting participants.
- You can participate in the meeting from a laptop, desktop computer or mobile device. Register for this meeting by visiting [bit.ly/brace-point](https://bit.ly/brace-point).
- A video recording will be provided the next day on our project website: [seattle.gov/city-light/current-projects](https://seattle.gov/city-light/current-projects)

## PROJECT DETAILS

- Trenching for conduits will occur in the public right-of-way (e.g., street, lawn, planting strips). Crews will cover trenches with steel plates outside of construction work hours. The contractor may be working in multiple locations at a time. Crews will work to limit parking and traffic impacts.
- Construction will require some road closures to traffic during work hours. Detour signage will direct traffic where possible. Crews may limit driveway access to houses closest to construction areas during working hours. Vehicles will be able to pass during non-working hours.
- The project will not cause interruption to your mail delivery or garbage/recycling/yard waste service. Please leave your cans on the curb as you usually do.
- **Maintenance power outages are required to do the work safely. City Light will notify affected residents in advance before any outage.**
- Private service connections to homes are not included in this work. The homeowner is responsible for installing new conduits in their private property.

- The contractor will work closely with the Seattle Department of Transportation's (SDOT) Urban Forestry group to protect trees and mitigate any removals. SDOT staff may be on-site to monitor this work.
- All affected streets and landscaping will be restored and repaved in kind, per SDOT standards.

## TIMING & COORDINATION

**Start Date:** August 2021

**Duration:** Two to three years

**Work Hours:** Mon-Fri, 8 a.m. – 5 p.m.
