

# CONSTRUCTION UPDATE

April 11, 2022 | SEWER PIPE REPAIR IN YOUR NEIGHBORHOOD

## PROJECT DESCRIPTION

Seattle Public Utilities (SPU) is returning to perform pavement restoration following a sewer pipe repair work performed in mid-2021. SPU is performing the sewer pipe repair work as part of a city-wide sewer restoration effort.

## LOCATION

Work will occur on California Ave SW between SW Frontenac St and SW Othello St.

## SCHEDULE

Pavement restoration work is expected to begin as early as April 18 and take up to 4 weeks to complete. Construction activities will occur Monday through Friday from 9 am to 3 pm. Crews may be on-site prior to or after to perform non-roadway blocking activities. Note, start date, duration and working hours are subject to change due to permitting, weather, and other factors. Pavement may be impacted by labor strikes and weather restrictions.

## ANTICIPATED IMPACTS

Residents and businesses will continue to receive normal services during construction. However, you can expect:

- Increased construction traffic and staging of large equipment in the area.
- Construction noise, dirt, vibrations, and pavement excavation and removal.
- Limited access to adjacent driveways while work is occurring. Crews will coordinate with residents needing local driveway access.
- Temporary traffic diversion, bicycle lane closures, and parking restrictions on California Ave SW and SW Myrtle St. Please pay attention to on-site signage and flaggers.
